

## **A Policy With Respect To Snow Removal Operations**

The policy of Henry County Highway Department with respect to snow removal operations is to prioritize snow removal operations in the best judgement of the Henry County Engineer with the following order of priority being given consideration:

1. Plow main roads especially those involved with police, fire and ambulance usage.
2. Plow roads needed for essential services including hospitals, clinics, utilities, food, fuel sources and local schools.
3. Plow wider widths on roads.
4. Prioritize and check intersections. Begin removing snow-obstructing vision where snow exists in piles or mounds of over the driver eye height used in the Manual on Uniform Traffic Control Devices for streets and highways.
